

This Supplemental Examiner's amendment is necessitated because several minor amendments to the specification, abstract, and claims were overlooked in the previous Examiner's amendment. Accordingly, the below supplemental Examiner's amendment replaces the previous Examiner's amendment in its entirety. In addition, Reasons for Allowance are indicated below.

Supplemental Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Reasons for Allowance

The prior art does not teach nor reasonably suggest a polyherbal preparation for treating
and/or reducing the risk of atherosclerosis and hyperlipidemia comprising an effective amount of
a combination of the six recited ingredients - as instantly claimed. It should be noted that
although the corresponding PCT Chapter II opinion (409) submitted with the IDS filed 07

February 2008 indicates that a 2002 abstract reference (in which the instant inventor is the lead author) appears to anticipate the instantly claimed invention, this 2002 reference (as well as a subsequent 2004 reference - both of which disclose a polyherbal mixture comprising five of the instantly claimed herbal ingredients therein) does not teach or reasonably suggest the inclusion of Shankha Bhasma (which the prior art discloses is prepared from conch shells - as evidenced by the attached reference by Motlag et al.) therein - as instantly claimed. Further, there is no suggestion in the prior art to add Shankha Bhasma to such a polyherbal preparation, including an effective amount thereof for the intended purpose of treating and/or reducing the risk of atherosclerosis and hyperlipidemia.

Claims 1-5 are allowed.
